PERSONAL PROJECTS

•**Personal portfolio website**

I have developed a responsive and visually engaging personal portfolio website.

– Using HTML, CSS, JavaScript, and Bootstrap, along with various other open-source libraries and components.
– The portfolio showcases my skills, projects, and experiences in a structured and user-friendly manner, reflecting both my technical proficiency and design sensibilities

•**Currency exchange website**

Developed a responsive and useful currency transform website.

– Built a responsive, interactive currency converter using HTML, CSS, and JavaScript with React for a dynamic UI. Designed for both functionality and a smooth user experience without external CSS frameworks.
– Integrated live exchange rates using a public API, implemented dark mode toggle, hover animations, and real-time flag updates based on selected currencies.

•**UI For Good Reads**

Used Figma to rewamp the website

– Used figma along with design sesnibilties to make nice frontend experience
– Took a note on UX principles before wireframing
